Eucharistic Miracles
Deacon Bob Gignilliat

When you look at the Crucifix,
you understand how much Jesus loved you then.
When you look at the Sacred Host,
you understand how much He loves you now.
~ St. Teresa of Calcutta.

1. What did you find most interesting about this talk? Any thoughts about:
 - the Lord's Prayer reference to BREAD meant "Super Substantial Bread"
 - the NASA scientists filming capturing bright lights from the pyx and the host
 - the increase in miracles over the recent years
 2. Deacon Bob described countless cases of Eucharistic Miracles in general, as well as those during Communion.
 - What did you find most interesting about these miracles?
 - Did you notice anything they have in common? If so, what?
 - Was there one that particularly struck you? Explain.
 3. Having heard this talk ...
 - How did learning about these miracles increase your belief in the true presence of Jesus in the Eucharist?
 - How does that increase **YOUR** faith knowing when you consume the Eucharist, miraculous things are happening in **YOU**? How can we increase **OTHER'S** awareness and ultimately their faith in the Eucharist..
 - 4.. Deacon Bob spent about half of his talk sharing the miracles in his hometown of Worcester, MA and the miracles that surrounded Audrey Santo.
 - What did you find most interesting about these miracles?
 - What did they have in common or what differences did you notice?
 - Was there one that particularly struck you? Explain.
-

The following are some of the results of extensive scientific testing.

- The "**Miraculous Flesh**" is authentic flesh consisting of muscular striated tissue of the myocardium.
 - It is **LIVING** tissue because it responds rapidly to all the clinical reactions distinctive of living beings.
 - It was inflamed and had white blood cells, meaning the heart was alive and pumping when the sample was taken. The heart showed signs of being under **SEVERE STRESS**.
- The "**Miraculous Blood**" is truly blood with absolute and indisputable certainty.
 - The blood TYPE is always "**AB**" – the same as the Shroud of Turin & most typical of the Middle East.
 - The white blood cells were **LIVING** at the time they were collected, even though they normally die within two hours after being taken from a body.
 - The proteins contained in the Blood have the normal distribution, in the identical percentage as that of the serous-proteic chart for normal **FRESH** blood.
 - The blood originated from the **INTERIOR** of the Host, excluding the hypothesis that someone could have placed blood in the Host from the outside.
